Moving to electronic Clinical Quality Measures (eCQMs)
IS COMPLEX.

1 Begin reporting eCQMs alongside **ABSTRACTED MEASURES.**

eCQMs → Abstracted Measures

2 Plan for eCQM requirements to **INCREASE QUICKLY** over the next few years.

Abstracted Measures Patient Sample

	28	24	12	12-	eCQMs All Patients
		4	16	16+	
	'15	'16	'17	'18	

3 Variations in workflow, unstructured electronic documentation and technology configurations can lead to missing, misplaced or incorrect data.

Data Missing!

Measure	Description	Electronic	Abstracted
PN-6b	Antibiotic Selection PN for Non-ICU Patients	47.4%	100%
SCIP-9	Urinary Catheter Removed on POD1 or POD2 with Surgery Day Zero	64.0%	97.9%
STK-3	Anticoag for Afib/Flutter	66.1%	94.2%
VTE-1	VTE Prophylaxis	71.6%	99.2%
VTE-3	Overlap Therapy	35.6%	100%
VT-6E	Preventable VET (Goal is 0%)	58.5%	0.0%

4 Deliver the same quality care yet see a **SUBSTANTIAL DIFFERENCE** between eCQM and abstracted measure performance.

5 Report inferior eCQM measure performance and **INCUR POTENTIAL NEGATIVE REIMBURSEMENT IMPACTS.**

6 **BURDEN YOUR TEAM** with the constant cycle of maintaining current performance and the annual addition of new measures by the government, payers and credentialing organizations.

ANALYSIS • REMEDIATION • TESTING • SUBMISSION

encore CAN HELP.
You choose the level of help you need

eMeasures Strategy HealthCheck
Quickly identifies which of your eCQMs differ from their abstracted counterparts and provides a strategy for which eCQMs an organization should report.
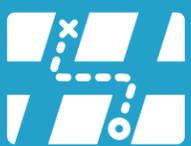

eMeasures Assessment
Identifies the root causes of those differences and builds an action plan to fix them.

Gap Remediation
Provides you with leadership and subject matter expertise to execute the action plan and improve your eCQM performance.

Encore's end-to-end eMeasures Program Management
Shifts the burden of managing your eCQMs, including the never-ending cycles of analysis, testing, remediation, and submission, to us.

Goal

- eMeasures performance rates are in line with abstracted measure performance rates
- eMeasure performance rates are reflective of the quality of care delivered
- Reimbursement is not negatively impacted by eMeasures
- eMeasure performance rates are ready for public reporting
- eMeasures program is well positioned to adapt to future changes in quality reporting
